

# SUVETHA MANIKANDAN

suvethamanikandan23@gmail.com — +91 9751612833 — Villupuram, Tamil Nadu

## Profile

Software Developer with hands-on experience at UST supporting a large-scale enterprise network migration and desktop/asset operations for a Fortune-level BFSI account. Strong foundation in C++, Python, cloud technologies, troubleshooting, automation, and stakeholder coordination. Passionate about building scalable software solutions and continuously learning modern technologies.

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                     |

|                                                                                                                                                                                                                                                    |                                  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| GW-BASIC Interpreter in C++ (64-bit)                                                                                                                                                                                                               | C++                              |
| <ul style="list-style-type: none"><li>Developed the parser module using Recursive Descent Parsing to construct an Abstract Syntax Tree (AST), supporting expressions, control structures, and system commands with modular architecture.</li></ul> |                                  |
| Gesture Recognition with Voice-Based Assistant for the Visually Impaired                                                                                                                                                                           | Python, OpenCV, Machine Learning |
| <ul style="list-style-type: none"><li>Developed a vision-based gesture recognition system that interprets hand/body gestures and performs device actions.</li><li>Awarded at Inter-College Codefest 2023.</li></ul>                                |                                  |
| Stock Management System                                                                                                                                                                                                                            | Python Django, HTML/CSS, SQL     |
| <ul style="list-style-type: none"><li>Built a supermarket stock and sales management system capable of generating sales and return reports.</li></ul>                                                                                              |                                  |

## Technical Skills

**Programming Languages:** C++, Python, HTML/CSS, SQL  
**Tools:** Git, Visual Studio, Jira  
**Technologies:** Software Testing, SD-WAN, Network Troubleshooting, Endpoint Management.

## Education

|                                                 |             |
|-------------------------------------------------|-------------|
| IFET College of Engineering, Villupuram         | 2020 – 2024 |
| B.E. Computer Science & Engineering             | CGPA: 8.05  |
| Saraswathi Matric Higher Secondary School       | 2019 – 2020 |
| Higher Secondary                                |             |
| Sacred Heart Convent AI Higher Secondary School | 2017 – 2018 |
| SSLC                                            |             |

## Certifications & Training

- AWS Certified Cloud Practitioner** – AWS Training and Certification (June 2024)
- Web Development** – Inplant Training, NexGen Technology
- Selenium Automation using Java** – Inplant Training, Arise Infomatics; automated testing on Facebook, Instagram, Amazon, and Flipkart
