Profile

As a passionate software developer, I bring hands-on experience from my training at UST, along with exposure to cloud technologies, automation tools, and agile workflows. I'm eager to keep learning, grow with experienced teams, and build impactful software solutions.

Experience

UST, Chennai -Software Developer – 1

03/2025 – *present* | Chennai, Tamil Nadu

Undergoing training in software development, focusing on C++ ,Java and core programming concepts.

- Contributing to debugging, testing, and maintaining application features.
- Participating in code reviews, team discussions, and technical documentation

Education

IFET COLLEGE OF ENGINEERING-VILLUPURAM

2020-2024

BE-Computer Science And Engineering
CGPA:8.05

SARASWATHI MATRIC HIGHER SECONDARY SCHOOL-VILLUPURAM

2019-2020

Higher Secondary
Percentage:58.35%

SACRED HEART CONVENT AL. HIGHER SECONDARY SCHOOL-VILLUPURAM

2017-2018

SSLC
Percentage:71.4%

Technical Skills

Programming:

- Primary Skills: C++ , C , Java, HTML/CSS , Python , SQL
- Secondary Skills: Flutter(Dart Programming)

Tools:

- Visual studio, Git , Jira, Eclipse

Other Skill:

- AWS , Software Testing

Projects

✓ GW-BASIC PROGRAMMING LANGUAGE USING C++ (64 bit)

- Implemented the parser module of a 64-bit GW-BASIC interpreter in C++, using a recursive-descent approach to build an Abstract Syntax Tree (AST).
- Designed it to handle expressions, control structures, and system commands with clean, modular, and reusable code.

TOOLS:C++

✓ HEALTHCARE MOBILE APPLICATION DEVELOPMENT USING FLUTTER FRAMEWORK

- It is a flutter based android application with firebase.

TOOLS: Flutter, Dart programming, Firebase, Android Studio

✓ **GESTURE RECOGNITION WITH VOICE BASED ASSISTANT FOR VISUALLY IMPAIRED**

- Non-verbal communication includes movement of a person's body hand is analyzed by Web camera. The sign language is matches with the given dataset and perform the appropriate events in the device.

TOOLS: Python , Open CV, Machine Learning Models.

- Received an award from inter-college codefest program-2023.

✓ **STOCK MANAGEMENT SYSTEM USING PYTHON DJANGO**

- This project is about to maintaining stocks in supermarkets. This system generates a detailed list of all reviews written by the administrator. A corporation or business may use the system to track and manage their products/stocks, sales transactions, and other related transactions. Reports such as the Sales Report, Return of Goods Report, and others are produced by this project.

TOOLS: Python Django, HTML, CSS, SQL

Certification

AWS CLOUD PRACTITIONER – AWS Certified Cloud Practitioner issued by AWS training and certification on June 5,2024.

Inplant Training

NEXGEN TECHNOLOGY-WEB DEVELOPMENT

- Acquired the knowledge of basic fundamental concepts in web development and how to design a website.

ARISE INFOMATICS-SELENIUM AUTOMATION USING JAVA

- Obtained a basic knowledge about testing and automated testing using selenium tool and practiced the testing tool in social media and shopping applications like Facebook, Instagram, Amazon, Flipkart, etc.,.

Internship

TWILIGHT IT SOLUTION-ANDROID DEVELOPMENT(FLUTTER)

- Worked on Healthcare real-time flutter project with firebase connectivity.
