

SUVETHA MANIKANDAN

Technical Associate — Open to Development, QA & Support Roles

Mob: +91 9751612833 | Email: suvethamanikandan23@gmail.com | Location: Villupuram, Tamil Nadu

KEY HIGHLIGHTS

- Computer Science graduate transitioning from Production Support into technical roles (development, QA automation, technical support)
- Real, hands-on professional experience in enterprise network migration, desktop support, and IT asset operations at UST
- Practical, training-based knowledge of C++, Python, Selenium automation (Java), and AWS cloud fundamentals

TECHNICAL SKILLS

Programming Languages : C++, Python, HTML/CSS, SQL

Testing & Automation : Selenium (with Java), Automated Testing, Software Testing

Tools : Git, Visual Studio, Jira

Technologies : AWS, CI/CD Pipelines, SD-WAN, FortiClient, Network Troubleshooting, Endpoint Management, Asset Management

CERTIFICATIONS

AWS Certified Cloud Practitioner

AWS Training and Certification · June 2024

Web Development

Inplant Training, NexGen Technology

Selenium Automation using Java

Inplant Training, Arise Informatics

Android Development (Flutter)

Internship, Twilight IT Solution

EDUCATION

BE. Computer Science & Engineering 2020 -2024

IFET College of Engineering, Villupuram

CGPA: 8.05

Higher Secondary

2019 – 2020

Saraswathi Matric HSS

SSLC

2017 – 2018

Sacred Heart Convent AI HS

Profile

Computer Science graduate with practical, training-based knowledge of C++, Python, and Selenium-based test automation (Java), backed by hands-on academic and training projects in software development, automation testing, and mobile app development. Currently transitioning from a Production Support role at UST, and open to technical roles across software development, QA automation, or technical support — bringing hands-on experience coordinating large-scale enterprise operations (4,000+ branch network) alongside foundational exposure to AWS cloud.

Professional Experience

Production Support — Muthoot Account

Nov 2025 – Present

UST · Trivandrum

- Served as SME for the Muthoot SD-WAN migration from Citrix to FortiClient across 4,000+ branches, guiding field engineers and resolving network issues remotely
- Transitioned to desktop support and asset management after migration; resolved asset distribution discrepancies across 4,000+ branches
- Coordinated with asset vendors to track dispatches and ensure timely delivery and reconciliation of branch hardware
- Used endpoint management tools to remotely troubleshoot branch PCs and resolve end-user issues efficiently

Trainee — Software Development

Mar 2025 – Nov 2025

UST · Chennai

- Completed structured training in C++, Java, and core software engineering concepts
- Gained exposure to debugging, testing, feature enhancement, code review, and technical documentation practices through training exercises
- Trained in Jira for task/issue tracking and gained exposure to CI/CD pipeline concepts as part of the software development training

Projects

GW-BASIC Interpreter in C++ (64-bit)

C++

- Developed the parser module using Recursive Descent Parsing to construct an AST, supporting expressions, control structures, and system commands with modular architecture

Gesture Recognition with Voice-Based Assistant for the Visually Impaired

Python, OpenCV, ML

- Developed a vision-based gesture recognition system that interprets hand/body gestures and performs device actions; awarded at Inter-College Codefest 2023

Healthcare Mobile Application

Flutter, Dart, Firebase

- Developed an Android healthcare application with Firebase real-time database integration during internship

Stock Management System

Python Django, HTML/CSS, SQL

- Built a supermarket stock and sales management system capable of generating sales and return reports

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief. — Suvetha Manikandan
